

# Changes to Waste & Recycling Centres

From 3rd June 2019

## When visiting the Waste & Recycling Centres (WRCs):

All bagged materials that you bring to the WRCs will be opened and checked to show our team that they do not contain recycling before it can be placed in the general waste skip. You can make your visit easier by sorting recyclable from non-recyclable materials at home so that you can place items in the correct containers.

## Only non-recyclable items will be allowed in the general waste skip.

The items below can be recycled at our WRC's so please keep them out of your general waste bag:

 cardboard	 paper	 books	 household plastic packaging	 car batteries
 used engine oil	 tyres	 batteries	 small appliances	 large appliances
 fluorescent tubes	 low energy bulbs	 tvs & monitors	 mixed glass bottles & jars	 garden waste
 mixed textiles & clothes	 shoes	 carpet	 mattresses	 compact discs
 paint	 cartons	 furniture	 cooking oil	 gas bottles
 wood & timber	 plasterboard	 hardcore & rubble	 scrap metal	 food & drink cans

## Did you know that over 40% of waste thrown in the general waste container at our WRCs could have been either recycled or reused?

Pembrokeshire Council needs to increase the amount that we recycle to meet Welsh Government targets. If we miss these targets, we will be fined. We currently recycle 60% of our waste, but we need to recycle 64% by next year and 70% by 2024/25. These improvements will help meet those demands and improve our environment.
